SUSTAINING SHADES

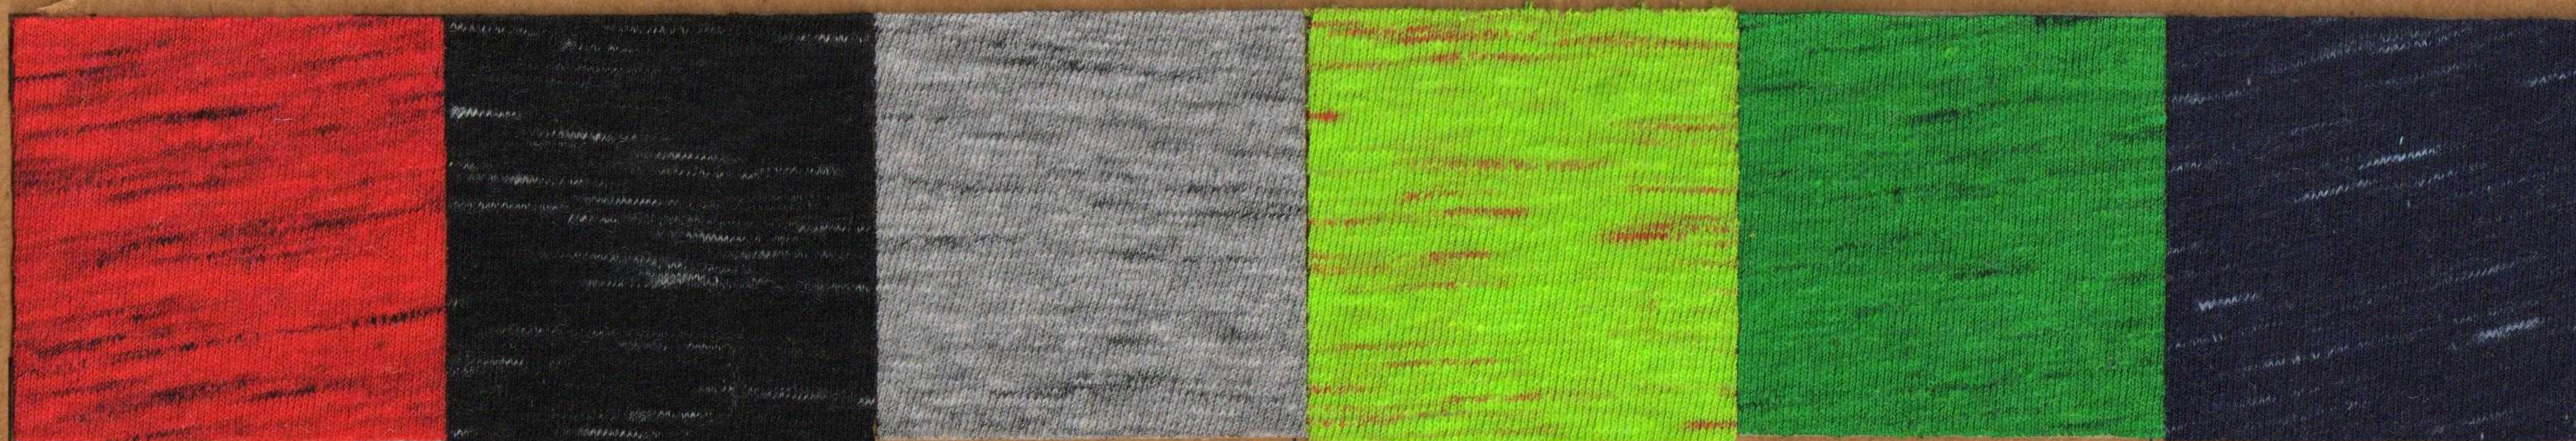

LET'S TAKE CARE OF OUR PLANET

The shades showcased here are a result of a remarkable breakthrough in the yarn industry where Sulochana has made a milestone by contributing in making our earth a greener planet. Unlike traditional yarn, these are made from recycling old PET bottles and shredded open garment waste without consuming a single drop of water.

The end results are mind blowing. Eco friendly Polyester and cotton, Less CO2 emissions, less soil pollution and obviously **MORE WATER** for our future generation.

As a result of recycling, the combination of these shades are estimated to be around 55% Polyester and 45% Cotton.

LIVING COLORS

Note : Colors here are only for shade references. The actual handfeel and quality of the fabric may vary. Colors may not be homogenic across batches.

LETS GO **ECO-FRIENDLY**

Fashion, Cuisine and Environment are the things that can never be compromised. Give your clothes and our planet a new life by replacing traditional yarn with our Unique, Eco-Friendly, Sustainable Yarns made from Recycled PET Bottles and Cotton coming from pre-consumed garment waste.
